Driven sheaves and sprockets should align with their drivers and idlers as closely as possible to prevent excessive wear on drive components. Hold a straight edge along side the drive to check alignment. Align these drives in the following sequence:

A. Reel Drive Chain

Align the driven sprocket with its driver by moving washers on either side of the driven sprocket. Align the idler by shifting washers from one side of its hub to the other.

B. Reel Drive Belt

Position the driven sheave on the reel shaft to align with the variable drive sheave. Line up idler as in A above.

C. Roll Drive Chain
